The author, probably reflecting a feeling that is
 widespread among European intellectuals, feels un-
 easy about the "Spirit of Camp David"; he is certain
 that the Soviet Union will continue to be aggressive
 and expresses the hope that the Western alliance will
 overcome its basic weaknesses, lack of political
 purpose and military deficiency in order to be able to
 resist Soviet pressure. (Translator)

THE USE OF BOLTS MADE OF LIGHT ALLOYS FOR THE MECHANICAL JOINING OF ALUMINUM CONDUCTORS. 1 Nov 52, 40, (figs. omitted). Order from SLA \$1.10

62-18439

Trans. of Revue de l'Aluminium (France) 1951 [v. 28, no. 182] p. 393-395.

DESCRIPTORS: *Conductors, *Aluminum, Electric connectors, *Bolts, *Aluminum alloys, Joints.

The use of high-strength bolts of light alloys for the mechanical joining of aluminium conductors makes it possible to keep the contact-pressure constant regardless of variations of temperature. This avoids the risk of creep in case of overheating or of poor contact in case of cooling; such risks are likely to occur with steel bolts, especially if the temperature, during the placing operation, is rather high.
